

ULTRASONIC

Distance and Proximity Sensors

UFP / UPA Series

Key-Features:

- Available measurement ranges from 200 to 6000 mm
- Ultrasonic distance sensor or 1/2 point proximity switch
- Teachable measurement range
- M12/ M18/ M30 thread housings
- Linearity up to 0.3 %
- Working temperature -20 to +70 °C
- Measurement is independent of the targets material, surface, colour or transparency
- Protection class IP65/ IP67

TEACH-IN GUIDE

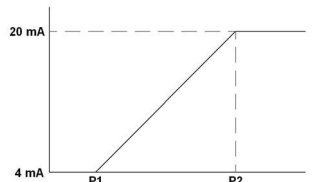

Analog Output 0...10 V / 4...20 mA (Teach-In)

Normal operation:

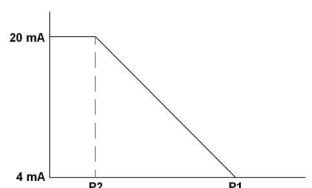

EC (Echo LED) **GREEN**: Activates whenever echo is received (support for orientation).
P1 LED, P2 LED **YELLOW**: One of the lamps is lit whenever the target quits the zone between P1 and P2
Teach-In (Line): Connect activating line to GND (time required for teach-in: ca. 30 sec).

Characteristic curve ($P1 < P2$): $P1 = 0 \text{ V} / 4 \text{ mA}$ und $P2 = 10 \text{ V} / 20 \text{ mA}$

- Teach-In must remain coupled to GND (ca. 6 - 8 sec.), until EC (Echo LED) and P1 start to flash (2 Hz) (UFP-200 only YELLOW).
- Now P1 starts to flash (1 Hz), and EC (Echo) is ready to operate, serving as an aid for orientation. For UFP-200 model however, only YELLOW flashes (frequency 1/2 Hz).
The reference object has to be positioned in position 0 V / 4 mA. Acknowledge by interconnecting Teach-In and GND, just for a moment. From now on, the sensor works in normal operation with this selected P1 value.
- Connect Teach-In to GND one more time (for ca. 15 - 16 sec.), until EC (Echo LED) and P2 start to flash (2 Hz). For model UFP-200, only YELLOW, frequency 1 Hz).
- Procedure of step 2 is repeated for P2: As soon as the reference object has been installed in position 10 V / 20 mA (do not forget to confirm, as described above), the sensor accepts the new value for P2 and uses it for further operation.

Inverted characteristic curve ($P2 < P1$): $P2 = 0 \text{ V} / 4 \text{ mA}$ und $P1 = 10 \text{ V} / 20 \text{ mA}$

TEACH-IN GUIDE

2 point proximity switch (Teach-In)

Normal operation:

EC (Echo LED) GREEN: Is lit whenever echo is received (simplifies orientation).

P1 and P2 LED YELLOW: State of break-over point SP1 resp. SP2

Teach-In: Activating line (time required for teach-in: ca. 30 sec)

Set-up procedure for switching point SP1

1. Teach-In line must be coupled to GND (ca. 6 - 8 sec.), until EC (Echo LED) and P1 start to flash (2 Hz). For UFP-200: Only YELLOW.
2. P1 starts to flash at a frequency of 1 Hz, and EC LED is active (for orientation purpose). For UFP-200 however, YELLOW flashes (only ½ Hz). The reference object has to be positioned. Acknowledge by shortly interconnecting Teach-In and GND.
3. During teach-in, LED P1 visualizes the behavior of switching point SP1. If the lamp is lit: NO for SP1. Lamp off: NC characteristics.

Set-up procedure for switching point SP2

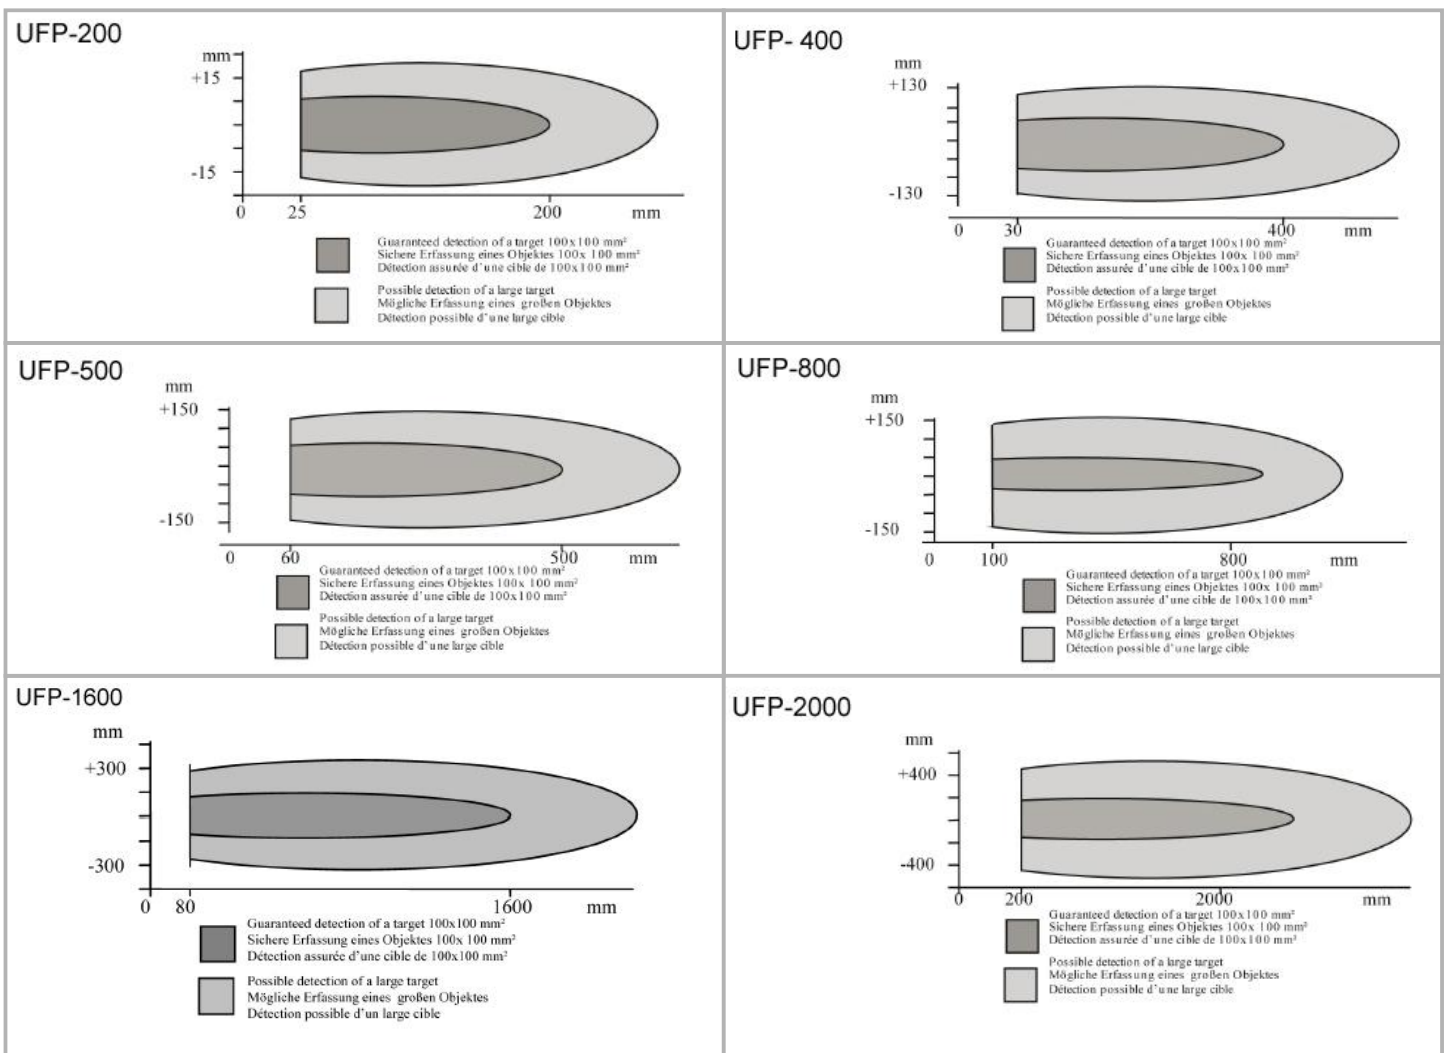

1. Teach-In line must be coupled to GND (ca. 14 - 18 sec.), until EC (Echo LED) and P2 start to flash (2 Hz). For UFP-200 only yellow (1 Hz).
2. P2 starts to flash at a frequency of 1 Hz, and EC LED is active (support for orientation). For UFP-200 however, only YELLOW flashes (½ Hz). The reference object has to be positioned. Acknowledge by shortly interconnecting Teach-In and GND). For UFP-200, the hysteresis distance should not be confirmed, before the yellow LED is illuminated.
3. During teach-in, LED P1 visualizes the behavior of switching point SP2. If the lamp is lit: NO for SP1. Lamp off: NC characteristics.

Window function / hysteresis function

1. If for UFP-200, teach-in procedure is carried out only for SP1, SP2 automatically is accepted for this distance + 1%.
2. If both P1 and P2 LED's are OFF, the sensor reads the window function. If an object is between P1 and P2, then: SP1 ON, SP2 OFF
3. If during Teach-In, both P1 and P2 LED's are lit, the sensor uses the hysteresis function. SP1 (normally open contact) and SP2 (normally closed contact) are at P1 and have the hysteresis of P1-P2.

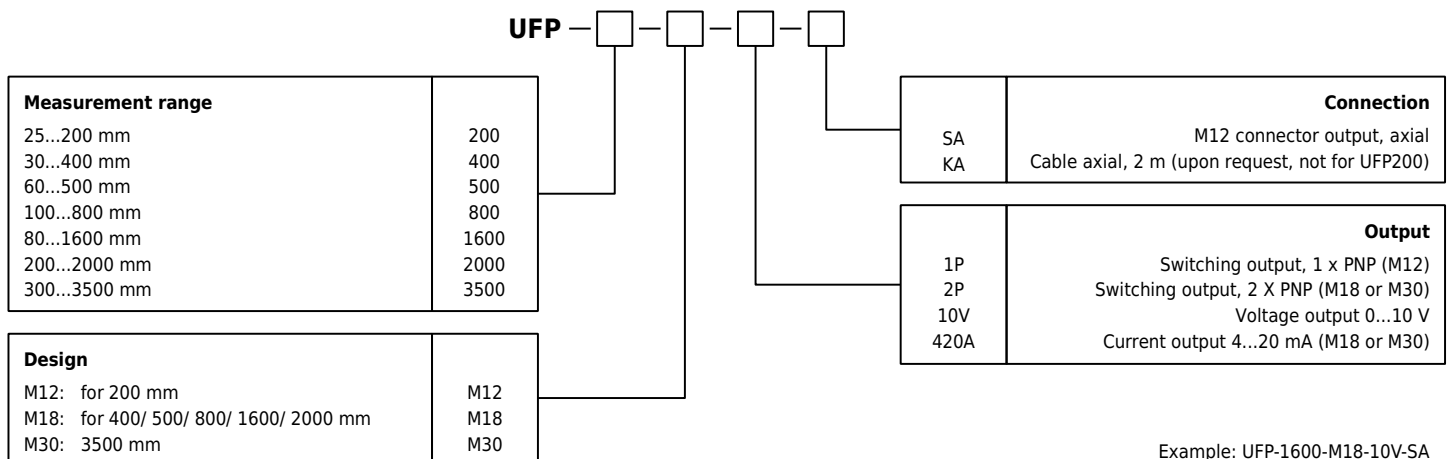

SOUND CONE GEOMETRY

The exact geometry of the sound cone depends on the: air-pressure, temperature, humidity and size of the target.

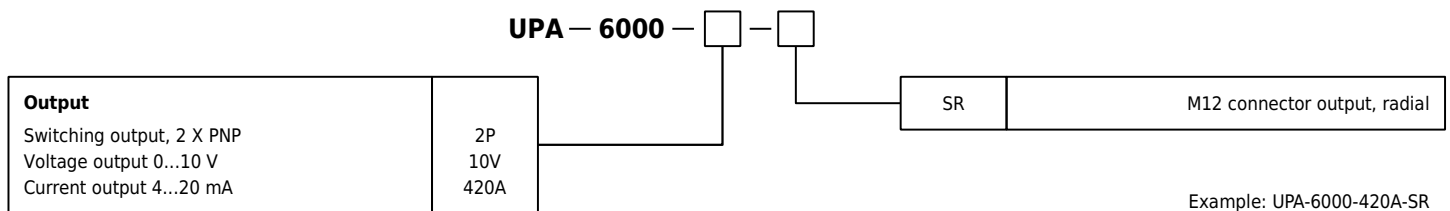

Sound cone geometry of the models UFP3500 and UPA600 on request.
